Patent No. US2002012820A1

GENERAL INFORMATION:

APPLICANT: Gleave, Martin

APPLICANT: Gleave, Martin

APPLICANT: Miyake, Hideaki

APPLICANT: Nelson, Colleen

TITLE OF INVENTION: TRPM-2 ANTISENSE THERAPY
FILE REFERENCE: UBC.P-020-2

CURRENT PELLION NUMBER: US/09/944,326

CURRENT FILING DATE: 2001-08-30

PRIOR APPLICATION NUMBER: 60/121,726

PRIOR PELLING DATE: 1999-02-26

PRIOR FILING DATE: 1999-02-26

PRIOR FILING DATE: 2001-08-10

NUMBER OF SEQ ID NOS: 14

SEQ ID NO 7

LENGTH: 21
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     US-05-344-326-9/C

Sequence 40, Application US/10646391A

Sequence 40, Application US/10646391A

Publication No. US20040082534A1

GENERAL INFORMATION:

APPLICANT: Gleave, Martin

APPLICANT: Gleave, Martin

TITLE OF INVENTION: Treatment of Melanoma by Reduction in Clusterin Levels

TITLE OF INVENTION: USC.P-035

CURRENT APPLICATION NUMBER: US/10/646,391A

CURRENT FILING DATE: 2003-08-21

PRIOR APPLICATION NUMBER: US 60/405,193

PRIOR FILING DATE: 2002-08-21

PRIOR PAPLICATION NUMBER: US 60/319,748
